

Chamber Expanding Brush

Chamber Expanding Brush

We have expanded our brush range to include an expanding brush for large calibre weapon chambers. The product works like the current cleaning brush for the barrel but expands to clean the entire chamber. The expanding brush can service the chambers of all weapon calibres from 105mm up to 155mm with a maximum range expansion of 45mm. For example, the brush is capable of cleaning a 155mm chamber which expands to 200mm.

The brush works in tandem with the standard Airnesco Barrel Cleaning System and requires no special adaptors or tools. A range of fluids targeting problem deposits within the barrel are also available from Airnesco.

Along with our latest developments; F701C Ferret, cerakoted finish, new range of cleaning fluids, enhanced safety couplings and the distribution brush, the Airnesco Bore Cleaning System continues to lead the way in Automated Barrel Cleaning Systems from 20mm up to 203mm for all NATO, non-NATO, chromed, smooth or rifled weapons including mortars and launchers. Fully codified and certificated with over 20 years of exclusive use within the British and US Forces, amongst many others.

For more information please visit www.airnesco.com, email us on info@airnesco or call us on 01622 850470.
